Dear colleagues! Dear participants and guests of the Congress!

On behalf of the Kazakh Research Institute of Oncology and Radiology, I welcome the participants of the 10th Congress of Oncologists and Radiologists of Kazakhstan!

The development of oncology care in our country has been a complex process, from the opening of an oncology department at the city clinical hospital in 1945 to the founding of the oncology research institute in 1960. Today, KazIOR is a leading research and clinical center, coordinating the activities of a vast network of modern oncology organizations nationwide.

Since 1964, KazIOR has served as a reference laboratory for the World Health Organization and has consistently pursued a strategy to advance scientific research, introduce innovative technologies, digitalize clinical processes, and expand international cooperation.

The 10th Anniversary Congress of Oncologists and Radiologists of Kazakhstan is a significant professional platform for exchanging cutting-edge scientific achievements, consolidating expertise, and developing effective solutions in the prevention, diagnosis, and treatment of malignant neoplasms.

The congress will bring together leading experts in oncology, radiology, drug therapy, clinical research, and digital technologies from Kazakhstan, the CIS, Europe, Asia, and the Americas. With medical technology and oncology science rapidly advancing, the combined efforts of the professional community, research centers, and international partners will shape the sustainable future of oncology services.

I am confident that the active participation and contributions of each attendee will give the Congress significant practical and scientific value and help advance oncological care in the Republic of Kazakhstan.

Sincerely,
Chairman of the Board
